Introduction

1.1 Our Goal

The goal of this Project is to provide a open source all in one smart home solution that comes with a modular design and enables the user to easily modify and extend the system.

Executive Summary

Requirements

- 3.1 Hardware
- 3.2 Software
- 3.2.1 Microcontroller
- 3.2.2 Backend
- 3.2.3 Frontend

Concept

- 4.1 Networking Structure
- 4.1.1 MQTT
- 4.1.2 ESP NOW

ESP32

- 5.1 Project Structure
- 5.2 ESP NOW

[1]

Raspberry Pi

- 6.1 Raspberry to ESP Communication
- 6.2 Database
- 6.3 Web Server
